

FIRST
INTRODUCED
in 1936!

THE ORIGINAL
DEEKS[®]
THE PERFECT
DECOY

IMAGINE! You can carry a whole flock in your pocket! And when you're ready to hunt, you simply take them out, drop them on the water and PRESTO! You have a spread of full-size, full-color, lifelike decoys!

That's all there is to it. DEEKS are wonderful! Yes, sir, they're just what every hunter has dreamed of — light, compact, molded for detail, non-breakable, convenient in every respect. Even in rough water and a high wind, they will not upset or sink.

STORAGE • SPACE • ECONOMY!

24 dozen DEEKS take no more space than one dozen bulky decoys.

Take a DEEK from the Flock in Your Pocket!

Just drop it on the water, and

Presto!

It's inflated!

You have a full-size, full-color, lifelike decoy!

U.S. PAT. No. 2,201,164

Developed by experienced duck hunters, this foolproof, self-inflating decoy has every desirable feature.

It's a proven fact that hunters take to DEEKS like ducks take to water! DEEKS were developed by experienced hunters who felt, as you probably do, that plastic decoys are an unnecessary waste of energy and space. DEEKS have every desirable feature that experience and imagination could incorporate into one simple, workable device. Tested and perfected, DEEKS are the best news hunters have had in years. Be sure you have a supply of DEEKS this season.

*The Hunter's
Dream Decoy!*

PREPARING DEEKS FOR USE:

Insert a marble into the small knob on the breast of each DEEK, then tie your anchor line to it. The knob is placed scientifically to make the DEEK ride perfectly in the water.

When DEEKS are not in use, drop each anchor line inside its DEEK. This makes it easy to keep lines separated and untangled.

Each DEEK folds into a mere fistful, which means you can carry a big supply in the pockets of your hunting jacket — no bag of bulky decoys.

When you are ready to hunt, merely shake out the strings and anchors, toss or drop the DEEK on the water so the open stem hits first. DEEKS WILL INFLATE INSTANTLY! There is no time lost for blowing up or squeezing the air out. To deflate the DEEKS, just pick them up!

No Other Duck Decoy Offers All These Amazing Features:

SELF-INFLATING — You shake out a DEEK and toss it on the water. It inflates instantly! A whole flock is afloat in two minutes time. Anchors and cords fall out without tangling.

LIFELIKE IN SIZE AND COLOR — DEEKS molded in detail and painted in natural, wild-like colors, have NO GLARE OR SHINE. Eyes, feathers, wings, etc., are designed in relief. DEEKS "weathervane" naturally in the wind. And ride high or deep, as desired, with perfect action in all weather conditions. Design of stem and ballast prevents unnatural side rolling or whipping back and forth. Rust-resistant metal ring in stem serves as a keel to insure perfect poise in the water.

TOUGH — Made of durable rubber, DEEKS will last many seasons when properly cared for. No breakable heads.

LIGHTWEIGHT — A DEEK weighs less than six ounces. A pocketful of DEEKS weighs less than a single unit of the elaborate, conventional plastic decoys. This weight advantage permits multiple use of each anchor, if desired, and makes carrying DEEKS a pleasure.

COMPACT — When not in use, DEEKS collapse and can be folded into a small bundle, a feature that makes it possible to carry a dozen or so in the pocket of a hunting jacket.
